

Decontamination & Tactical Medic Operational Decontamination

CBRN Decon Case (First Line)

CBRN response for every warrior

Case: 500 x 420 x 175 mm, approx. 7 kg

Decontamination

Immediate emergency response decontamination of personnel especially wearing field protective clothing in case of an attack with chemical warfare agents or improvised industry chemicals. Fast first response decontamination of humans in the field to undress the PPE.

Prevention of contamination displacement to recover the operational readings.

- Dry Decontamination Wipes
- Wet Decontamination Wipes
- TIC Decontamination Liquid
- CWA Decontamination Liquid

The decontamination liquids are made to spray on PPE before undressing but in emergency on human skin as well. The liquid can be used down to -20°C .

Supplementary: foldable Decon Basin

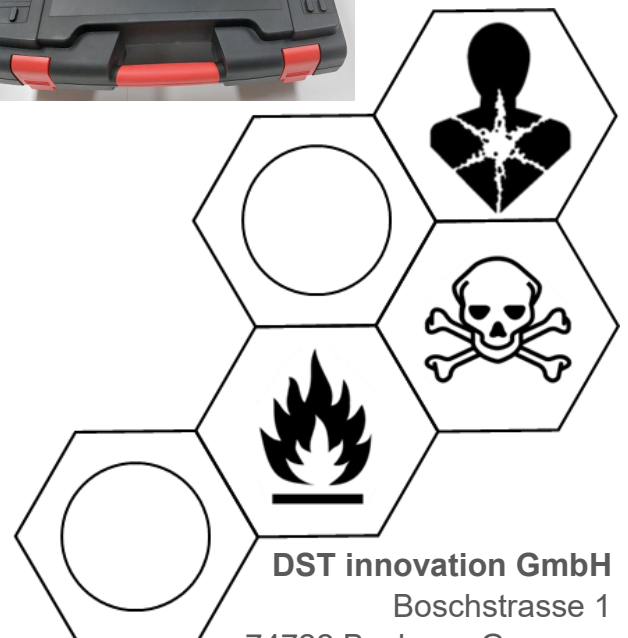

User and clients:

- trained warriors in the field
- critical infrastructure
- command posts
- civil defence force
- relief organisations
- everybody
